RETROSPECTIVE

What Went Well	
Frequent commits and merge	Sprint backlog was cleared
Branch usage	We met most of the client's requirements
Meeting is fine	Good communication between members

Improvement	
What needs to be improved	**How to improve**
Some of our git commit messages are confusing.	Git commit messages needs to be more specific
Unclear dev responsibility resulting in some people working on the same set of code and lack of **DOCUMENTED** collaboration	Clearer Task delineation during sprint planning, and further encouragement of team members to frequently document their doings on trello
We did not have a definition of done in the PBIs.	Include definition of done in PBI trello cards description
We have no QA person.	We assign QA role to Louis
We are working too slowly.	Set daily goals
